Section 47F

Minister Dutton

Prime minister

Why aren't you investigating the decisions minister Dutton is making regarding allocation of safer communities funding or is this just another sports rort affair? He has slashed funding from the top applicants and redirected to projects of his choice, overruling the merit system should bring in the authorities who oversee this kind of thing! He has not justified his choices, they have not been approved and much has been redacted. This lack of funding has created problems for those projects. He approved at least two projects before the approval process and some have gone to questionable projects. The applications he has approved do not provide value for money according to your own rules. Ministerial standards? Do they exist?
