

## Covid-19 response inquiry submission from Dr Rosemary Faire

<https://www.pmc.gov.au/covid-19-response-inquiry/>

### Short Intro about myself

My training and work life as an academic have encompassed fields of biological sciences (PhD), psychology (BSc), psychotherapy (Cert), expressive arts therapy (GradDip) and somatic/movement education (MA). I have taught biology and research methodology at tertiary level. Politically I was a Greens supporter, climate activist with *Citizens' Climate Lobby*, and an ABC news consumer until 2021. All that changed when the serious lying about COVID treatments and the injections by government and medical "experts" became obvious to me as a former biologist.

I am sending in this submission because I'm giving you, as a member of the "independent" panel, the benefit of a doubt that you are genuinely interested in "inquiring" rather than merely supporting/justifying the Approved Narrative.

I am probably wasting my time if you are unwilling or incapable of facing the cognitive dissonance and discomfort which all those who peek behind the curtain experience, or if you have been instructed not to accept the evidence from experts who have been conveniently labelled as "conspiracy theorists" or "antivaxxers" for daring to question the COVID orthodoxy.

### Terms of Reference I wish to address:

<https://www.pmc.gov.au/resources/commonwealth-government-covid-19-response-inquiry-terms-reference>

..."Specific areas of review may include, but **are not limited to**..."

From your list of terms of reference:

- **COVID-19 Vaccinations:** anyone who has been paying attention knows there have been huge issues around safety, efficacy, adverse event monitoring which have been raised by experts from Australia and overseas; for example, I refer you to the testimonies of Australian and international experts in the book **Too Many Dead** produced by the Australian Medical Professionals Society after their event in Canberra recently <https://amps.redunion.com.au/too-many-dead>; also see research reports from Australian scientists such as Wilson Sy: <https://www.researchgate.net/publication/368426122> Australian COVID-19 pandemic A Bradford Hill analysis of iatrogenic excess mortality, and Canadian expert Denis Rancourt's analysis of excess mortality data: <https://correlation-canada.org/covid-19-vaccine-associated-mortality-in-the-Southern-Hemisphere/> and specifically Australian data: [https://denisrancourt.ca/uploads\\_entries/1675971116775\\_Rancourt%20et%20al%202023%20-%20vDFR%20by%20age%20ISRAEL-AUSTRALIA%20-%20article----9d.pdf](https://denisrancourt.ca/uploads_entries/1675971116775_Rancourt%20et%20al%202023%20-%20vDFR%20by%20age%20ISRAEL-AUSTRALIA%20-%20article----9d.pdf) and Rancourt et al Probable causal assoc bet Aust all-cause mort and vacc rollout: <https://www.researchgate.net/publication/366445769> Probable causal association between Australia's new regime of high all-cause mortality and its COVID-19 vaccine rollout; also see research on the problems of the entire mRNA platform: <https://journals.plos.org/plospathogens/article?id=10.1371/journal.ppat.1010830>; Book on mRNA injections and immunology: <https://doctors4covidethics.org/mrna-vaccine-toxicity/>; Why mRNA platform needs to be banned altogether: <https://jessicar.substack.com/p/igg4-cd4s-and-why-the-lnpmrna-platform>; I personally know a young man who has been seriously harmed (myocarditis) by these injections and there are several mechanisms by which such cardiac injury is likely to occur including endotoxin: <https://geoffpain.substack.com/p/pfizer-process-2-endotoxin-myocarditis>; and contamination with cDNA: <https://worldcouncilforhealth.org/multimedia/urgent-hearing-dna-contamination-mrna-vaccines/>; Australian Prof Peter Miller on excess mort and early treatment data: <https://healthallianceaustralia.org/2023/06/02/professor-peter-miller/> and <https://healthallianceaustralia.org/articles/australian-excess-deaths-alarming-data/> (the data to back up Peter Miller's interview); Forensic analysis of Pfizer trial deaths found "evidence of an over 3.7-fold increase in number of deaths due to cardiovascular events in BNT162b2 vaccinated subjects compared to Placebo controls.": <https://ijvtpr.com/index.php/IJVTPr/article/view/86>; series critique of the injections and fallout: <https://www.opastpublishers.com/open-access-articles/covid19-vaccinesan-australian-review.pdf>

- **COVID-19 Treatments:** banning by TGA of early treatments (the ivermectin debacle was so obviously a takedown of a treatment by WHO and other regulators using manipulated meta-analysis <https://www.youtube.com/watch?v=D2ju5v4TAaQ> and other excuses; our Australian expert on drug development and experience with TGA, Dr Phillip Altman, repeatedly exposed the TGA ban to be unscientific <https://phillipaltman.substack.com/p/open-letter-to-the-tga-regarding>);
- **COVID-19 Treatment protocols** requiring doctors adhere to treatments such as ventilation, remdesivir and DNR pathways that caused iatrogenic harm to patients in hospitals; I have no direct experience of what went on in Australian hospitals thank goodness, but my doctor did tell me that they were using remdesivir, a drug with known deleterious effects on renal function; even the bizarre instructions given to the public about there being “no treatments” and to stay home and wait until their symptoms worsen sufficiently to be hospitalised, departed so strongly from ANY previous medical guidelines that they must be investigated fully as to their origin and motivation (aka, the obvious one of selling the “vaccines” down the track); Deadly hospital protocols - 25 commonalities from victim testimonies: <https://chbmp.org/commonalities/>;
- **Public Health Messaging** - censorship in MSM of every perspective except the government Narrative; outright lies in messaging (“dangerous horse pill”; “Safe & Effective”; “vanishingly rare” adverse events); messaging was downright abusive (Abuse psychology, Meredith Miller: <https://www.bitchute.com/video/CATXk9Dry80o/>) of those who, like myself, had many justifiable reservations about the safety of the mRNA/gene therapy platform being used as “vaccines”;
- **Securing vaccine supply deals:** there was NO transparency, secret deals were done, pharma co’s given indemnity, how many tax payer dollars were spent on injections and what are the kickbacks for those making these decisions? We all know there is a revolving door between regulators and Big Pharma.
- **Addressing labour shortages:** mandated injections (scientifically fraudulently justified as the shots did not prevent infection or transmission) meant many workers were sacked; most of these people were not ever reinstated (revenge for disobedience?) but rather workers imported;
- **The global experience and lessons learnt** from other countries in order to improve response measures “in the event of future global pandemics”: **excess deaths are still being ignored around the world; our Australian Senate voted against an inquiry into Australian excess deaths;** WHO is about to take full control via the amendments to IHR and pandemic treaty, so that in their “future pandemics” our sovereignty will amount to nothing and we will all be at the mercy of whatever madness the WHO dictates.

#### More terms of reference from my list:

- **WHO declaration of “pandemic”** amounts to a dictatorship by one man who heads up an unelected group with huge financial conflicts of interest due to funding asymmetries; we saw this clearly in the Monkeypox fiasco;
- Previous pandemic planning over decades was thrown out in 2020 - how and why and who was behind this? If it was a military run biosecurity emergency rollout of countermeasures, why was it masquerading as a public-health-regulated-by-TGA rollout?
- **PCR tests** have been shown to be totally inappropriate as a diagnostic tool; not only do they produce false positives when run at the commonly used but ridiculous 40-cycles, but they could easily have been picking up homologies with previous coronaviruses; **Dr Soňa Peková, Czech Republic, Day 3 Nuremberg 2.0:** <https://zeeemedia.com/interview/grand-jury-day-3-pcr-test/> (*Please note: if you look at a link and straight away judge it to be “conspiracy” without actually hearing the expert testimony, then you have succumbed to a very efficient Psychological Operation - think about it: if you were trying to tell the truth about something which governments were censoring, wouldn’t you go to “underground” media too, because no one else would allow you to speak? If you really are conducting an Inquiry, you won’t put expert testimonies in the bin before even listening to them.*)
- **Censorship of scientists and doctors** who critiqued the responses - MSM and social media tech giants obeyed government dictates to censor and propagandise the government message; <https://blog.rebekahbarnett.com.au/p/breaking-the-australian-government-colluded-with-big-tech-to-suppress-speech-on-covid/>; Canadian testimony by Rodney Palmer Full interview Day 1 Toronto on media propaganda: <https://nationalcitizensinquiry.ca/toronto-clips/>;

Marianne Klowak's testimony on CBC, National Citizen's Inquiry: <https://rumble.com/v2ojxea-former-veteran-cbc-reporter-testified-that-the-broadcaster-betrayed-the-pub.html>;

- **AHPRA** went after doctors and psychologists who practiced individualised medicine, gave honest opinions of risk/benefit, prescribed safe early treatments, warned against harms of injections, supported the **Nuremberg Code** (Nuremberg Code: [https://media.tghn.org/medialibrary/2011/04/BMJ No 7070 Volume 313 The Nuremberg Code.pdf](https://media.tghn.org/medialibrary/2011/04/BMJ%20No%207070%20Volume%20313%20The%20Nuremberg%20Code.pdf)), Helsinki Declaration and their own doctors code of conduct regarding informed consent;
- **Gaslighting** by the medical profession, politicians, media, of the people injured after the transfection injections; obvious to anyone paying attention. Even Dr Keryn Phelps!

“The panel will consider material from other **relevant reviews and inquiries** into COVID-19, including submissions and evidence where publicly available”:

My list of some of many inquiries (involving expert testimonies) which have already taken place and should be consulted by this inquiry:

**Australia:** <https://www.malcolmrobertsqld.com.au/the-covid-inquiry-2-0/>

<https://www.malcolmrobertsqld.com.au/covid-under-question-a-cross-party-inquiry/>

(NB. Dismissing expert testimony just because you don't like Senator Roberts is not “inquiring”)

**Canada:** <http://nationalcitizensinquiry.ca>

**European Parliament: International Covid Summit 3**

<https://www.internationalcovidsommit.com/media> parts 1, 2 and 3

**Romanian crisis/covid summit:** <https://www.internationalcovidsommit.com/>

**Doctors for Covid Ethics Symposium:** <https://doctors4covidethics.org/gold-standard-covid-science-in-practice-an-interdisciplinary-symposium-v-in-the-midst-of-darkness-light-prevails/>

**New Zealand Doctors:** Medical and government malfeasance: NZ: <https://nzdsos.com/2023/05/19/complete-disregard-for-bill-of-rights/>

### **Testimonies from the Vaccine Injured:**

The vile suggestion that such testimonies are from people who misattribute their injuries to the impeccable “Safe&Effective-vaccines” is insulting to people's intelligence and unacceptable, especially given the number of people who report such injuries. Given the social ostracising of families and individuals who have spoken up about such injuries, I would think it highly likely that these testimonies are a small fraction of the real toll.

Israel: The Testimonies Project: <https://worldcouncilforhealth.org/multimedia/avital-livny-the-testimonies-project/>

Australia: Forest of the Fallen <https://theforestofthefallen.com/about-us/>

<https://au.jabinjuriesglobal.com>

USA: Iatrogenesis victims (hospital protocols, mandates, jabs, dead & injured): <https://chbmp.org/cases/>

**My personal experience of friends injured by the injections:** truth in science comes in many forms, although the RCT-hegemony of late has brainwashed some into believing these are the only valid form of evidence; having taught research methodology I know that there are many valid ways in which scientists gather evidence, and these even include anecdotes and personal testimonies. I have already mentioned the young man whose heart has been severely affected, so much so that he was suicidal. He was gaslit by many doctors at first, until the evidence was undeniable. He is still undergoing a slow recovery. In addition, one of my close friends was injured in 2021 by her first AstraZeneca injection - she had a severe immune response affecting her skin and other areas, but her doctors gaslit her to the extent that they refused to give her an exemption for a second jab; outrageously they then suggested she get the mRNA jabs; fortunately she has not had any more since that first one and I am extremely grateful, having monitored the inadequate but still alarming TGA adverse events reports.

Dear Inquirer: I am extremely grateful that despite the lies, cover ups and media propaganda, there have been ethical doctors, scientists, psychologists, lawyers and journalists, some of whom I know personally, who have been prepared to sacrifice their careers/reputations to tell the truth. If those on this inquiry are half as ethical and brave, and actually read submissions like mine rather than binning them, Australia is not entirely lost.

Sincerely,

Dr Rosemary Faire, PhD
